Proposed changes to remuneration arrangements

- Macquarie's remuneration approach aims to:
 - align the interests of staff with shareholders; and
 - attract and retain quality staff
- Remuneration arrangements refined in light of global remuneration and regulatory trends
- Proposed changes remain consistent with Macquarie's long-standing approach
- Proposals expand on modifications made in 2008 which included an increase in the portion of performance based profit share deferred and allocated as equity for the CEO and other members of the Group's Executive Committee
- Key proposed changes announced during FY09 include:
 - For Executive Directors (EDs), profit share paid out in cash will be reduced and the percentage of retained profit share will be increased with retained profit share fully invested in a combination of fully paid ordinary Macquarie shares and Macquarie-managed fund equity
 - For EDs the vesting and payout schedule for retained profit share has been changed to 3-7 years
 - Amend payout of unvested retained profit share for departing EDs to include clawback provisions
 - Transitional arrangement that will align the old and new schemes
 - For all staff other than EDs, any retained profit share will be delivered in future in fully paid ordinary Macquarie shares
 - New share options granted will be substantially reduced, restricted to CEO and Executive Committee members, resulting in a reduction in the share options expense over time
 - If approved by shareholders, currently estimated that approx \$A500m of primarily prior years' and some current year retained profit share will be applied to the grant of fully paid ordinary Macquarie shares. These will be provided via the issue of new shares, priced at VWAP from 4 May 09 to 29 Jul 09
- Proposed changes to apply to remuneration for current year as well as future years
- Shareholder approval to be sought at July AGM
- Aim to deliver best outcome for Macquarie and shareholders

Macquarie model – focus over the medium term

- Client driven business
 - Main business focus is providing products and services to clients
 - Trading businesses focussed on client transactions
 - Minimal proprietary trading
- Alignment of interests with shareholders, investors, staff
 - Alignment through co-investment by Macquarie Group and staff
 - Performance driven remuneration
- Conservative approach to risk management
 - Conservative capital and funding profiles
 - Apply a stress test approach to all risk types, examining the consequences of worst case outcomes and gaining confidence they can be tolerated
 - Determine aggregate risk appetite by assessing risk relative to earnings more than by reference to capital
- Incremental growth and evolution
 - Significant portion of profit comes from businesses that did not exist five years ago but grow from areas of real expertise
 - Business initiatives driven from within the Operating Groups which are closest to markets and clients
- Diversified by business and geography
- An ability to adapt to change

- Result impacted by challenging market conditions
- Increased interest margins from fixed rate loan portfolio combined with full year contribution from retail loans issued to investors in Jun 07
 - Offset by increased funding costs
- Base fees lower across all asset classes, particularly real estate and infrastructure
- Other fee & commission income includes structuring fees, capital protection fees, wholesale threshold management fees and internal fees received for managing BFS products including the CMT
- Minimal asset and equity investment income
 - pcp included profit on sale of Macquarie-IMM
- Substantially lower contribution from seed investments and performance fee products due to adverse affects of market volatility

- Difficult market conditions have resulted in write-downs / equity losses / provisions including:
 - Real estate equity investments and inventory (\$A192m)
 - Real estate loans (\$A170m)
 - MCW, MOF (\$A25m)
- Base fees flat, performance fees well down
- Advisory fees includes fees on the sale of the interest in Macquarie Prime REIT and its manager
- Decrease in other fee income due to significantly reduced transaction activity across all real estate markets.
- Assets and equity investment income down due to lower level of asset realisations
 - Good contribution from MGPA equity accounted income
 - pcp included sale of Macquarie ProLogis Trust Management
- Significant transactions include the close of MGPA Fund III at \$US5.2b (MGPA Asia Fund III \$US3.9b and MGPA Europe Fund III \$US1.3b)

1. Internal revenue allocations are eliminated on consolidation in the Group's statutory P&L. 2. Management accounting profit before unallocated corporate costs, profit share and income tax.

FINANCIAL MANAGEMENT

Greg Ward –
Chief Financial Officer

Macquarie Group Limited

Result Announcement for the full year ended 31 March 2009

1 May 2009 – Presentation to Investors and Analysts

Highlights

- Continue to strengthen the balance sheet by extending the Group's term funding profile
 - Term assets more than covered by term funding
- Deposits up 42% from Mar 08 to \$A18.8b at Mar 09
 - Retail deposits up 103% from Mar 08 to \$A13.4b at Mar 09
- Reduced reliance on short-term wholesale funding markets
- Cash and liquid assets represent over 40% of the Group's funded balance sheet
 - 97% of liquid assets repo eligible with central banks, remaining securities short dated
- As with other global financial institutions, access to non-government guarantee funding markets remains exceptionally challenging
- \$A3.1b buffer of capital in excess of the Group's minimum capital requirements

Funded balance sheet reconciliation

- The Group's statutory balance sheet is prepared based on generally accepted accounting principles which do not represent actual funding requirements
- A funded balance sheet reconciliation has been prepared to reconcile the reported assets of the consolidated Group to the assets that require funding

- Well diversified funding sources
- Cash and liquid assets significantly exceed short-term wholesale issued paper
- Funded assets, excluding cash and liquid assets, reduced by \$A8.6b since Mar 08
- Size of MGL Senior credit facility reduced by \$A1.0b on early unwind of undrawn standby facility
- MBL deposits and wholesale funding eligible for Australian government guarantee

1. The Senior Credit Facility is a \$A7.8b term facility of which \$A0.4b remains undrawn. 2. This includes Convertible Preference Securities. 3. Equity includes ordinary capital and Macquarie Income Securities of \$A0.4b, and Hybrids include the Macquarie Income Preferred Securities of \$A0.4b

Term funding profile

- Excluding equity, the weighted average term to maturity of term funding increased from 3.5 years at Mar 08 to 3.7 years at Mar 09

Strong retail deposit growth

- Since Aug 07, Macquarie has been successful in pursuing its strategy of diversifying its funding sources through growing its deposit base
 - Retail deposits up 103% from Mar 08 to \$A13.4b at Mar 09

Regulatory capital strong

Macquarie Group Limited – Regulatory Capital Position (Mar 09)

- \$A3.1b buffer of capital in excess of the Group's minimum capital requirements
- MBL Banking Group capital ratios: Tier 1 - 11.4%; Total Capital - 14.4%

Changes in capital position since 30 September 2008

Group (MGL)

- Capital surplus remained strong at \$A3.1b (\$A3.3b at Sep 08)
- Capital supply flat:
 - Growth through retained earnings and DRP offset by MIPS refinancing
- Capital requirement up slightly:
 - Acquisition of Constellation Energy
 - Impact of FX
 - Offset by reduced Non-Banking Group equity commitments and write-downs

Banking Group (MBL)

- Tier 1 ratio up: 11.4% at Mar 09 from 11.0% at Sep 08
- Capital requirement of the Bank increased since Sep 08:
 - Acquisition of Constellation Energy
 - Impact of FX
 - Acquisition of leasing assets from Non-Banking Group
 - Increased regulatory deductions associated with credit market conditions
 - Partly offset by reduction in underlying RWA, e.g. sale of Italian Mortgages and Margin Lending portfolios
- Balanced by recapitalisation from MGL to the Bank of \$A0.6b

Explanation of Funded Balance Sheet Reconciling Items

- **Self funded trading assets:** There are a number of entries on the balance sheet that arise from the normal course of trading activity we conduct with our clients. They typically represent both sides of a transaction. The entries off-set each other as both the bought and sold positions are recorded separately. Where these entries are matched, they do not require funding.
- **Derivative re-valuation accounting gross ups:** Macquarie's derivative activities are client driven with client positions hedged by off-setting positions. The derivatives are largely matched and this adjustment reflects that the matched positions do not require funding.
- **Life investment contracts and other segregated assets:** These represent the assets and liabilities that are recognised where we have products such as investment-linked policy contracts. The policy (contract) liability will be matched by assets held to the same amount and hence do not require funding.
- **Broker settlement balances:** At any particular time our broking business will have outstanding trades to settle with other brokers. These amounts (payables) can be offset in terms of funding by amounts that we are owed at the same time by brokers on other trades (receivables).
- **Short term working capital assets:** As with the broker settlement balances above, Macquarie through its day-to-day operations generates working capital assets (e.g. receivables and prepayments) and working capital liabilities (e.g. creditors and accruals) that produce a 'net balance' that requires funding rather than the gross balance.
- **Securitised assets and non-recourse warehouses:** Some lending assets (mortgages and leasing) are commonly sold down into external securitisation entities or transferred to external funding warehouses. As a consequence they are non-recourse to Macquarie and are funded by third parties rather than Macquarie.

1. In calculating the Bank's contribution to Group capital requirement, Tier 1 deductions associated with intra-group exposures are eliminated (\$A127m as at Mar 09). 2. The capital requirement is calculated as the capital required for RWA, at the internal minimum Tier 1 ratio of the Banking Group (7%), plus Tier 1 deductions. 3. Intra-group loan eliminated for calculation of Group capital requirement

Macquarie Group regulatory capital Non-Banking Group framework

- APRA has specified a regulatory capital framework for MGL
- A dollar capital surplus is produced; no capital ratio calculation is specified
- APRA has approved Macquarie's Economic Capital Adequacy Model (ECAM) for use in calculating the regulatory capital requirement of the Non-Banking Group
- Any significant changes to the ECAM must be approved by the MGL Board and notified to APRA within 14 days
- The ECAM is based on similar principles and models as the Basel II regulatory capital framework for Banks, with both calculating capital at a one year 99.9% confidence level:

Risk ¹	Basel II	ECAM
Credit	<ul style="list-style-type: none"> Capital requirement determined by Basel II formula, with some parameters specified by the regulator (e.g. loss given default) 	<ul style="list-style-type: none"> Capital requirement determined by Basel II formula, but with internal estimates of some parameters
Equity	<ul style="list-style-type: none"> Simple risk-weight approach or deductions. Tier 1 capital requirement between 24% and 50% of face value² 	<ul style="list-style-type: none"> Extension of Basel II credit model to cover equity exposures. Capital requirement between 32% and 86% of face value; average 47%
Market	<ul style="list-style-type: none"> 3 times 10 day 99% Value at Risk (VaR) plus a specific risk charge 	<ul style="list-style-type: none"> Scenario-based approach. Greater capital requirement than under regulatory regime
Operational	<ul style="list-style-type: none"> Basel II Advanced Measurement Approach 	<ul style="list-style-type: none"> Basel II Advanced Measurement Approach

1. The ECAM also covers risk on assets held as part of business operations, e.g. fixed assets, goodwill, intangible assets, capitalised expenses and certain minority stakes in associated companies or stakes in joint ventures as well as non-traded interest rate risks. 2. Assuming an 8% Tier 1 ratio, the 300% and 400% risk weightings for equity exposures under Basel II equate to a capital requirement of 24% or 32%. Any deductions required for equity exposures are 50/50 Tier 1 and Tier 2, hence a 50% Tier 1 capital requirement

APPENDIX C

Additional information – Outlook operating groups

Macquarie Group Limited

Result Announcement for the full year ended 31 March 2009

1 May 2009 – Presentation to Investors and Analysts

Outlook operating groups

Macquarie Capital

- Reasonable pipeline, though difficult markets reducing the number of successful transactions and increasing time to completion
- Continue to examine opportunities to selectively grow the business (through acquisition or organically)
- Expect growth in medium term but short-term conditions remain challenging
- We expect the Macquarie Capital Funds business to remain resilient, with continued focus on growing unlisted funds under management

Treasury and Commodities Group

- Expect FY10 result to be up on this year's result
- Expect continued rationalisation of competitors
- Improved margins to continue
- Markets to remain volatile and less liquid
- Established businesses to pursue expansion opportunities through recruitment and acquisition
- Significant opportunities for new, growth business for e.g. Environmental Financial Products and Credit Trading
- Metals & Energy Capital expected to benefit from significantly improved lending and investing conditions

Macquarie Securities Group

- Expect conditions in global equity markets to remain challenging in the year ahead

Outlook operating groups

Banking and Financial Services Group

- Consolidation of current businesses to maintain market leading positions
- Continue organic growth of adviser numbers and look for acquisition opportunities
- Leverage recent launch of premium platform service in the UK
- Continue development of current offshore opportunities and partnerships where we can offer differentiated wealth management solutions
- Increased focus on risk management processes
- Expect FY10 to be up on FY09

Macquarie Funds Group

- Expect continued investment in business
- Strong relative investment performance across numerous products should enable organic growth as investor sentiment improves
- Market recovery should result in higher profit for MFG because it is predominantly a fixed-cost business
- Will use Macquarie's strong capital position to seek to gain global scale through acquisitions

Outlook operating groups

Corporate and Asset Finance Division

- Expect FY10 result overall to be up on FY09
- Ongoing review and continued tightening of financing guidelines
- Opportunities to acquire assets/businesses/customers
- Result will be subject to economic conditions globally

Real Estate Banking Division

- Continued credit market dislocation makes short to medium term outlook for the real estate sector particularly challenging
- Commercial real estate markets are expected to see further rent and price reductions in 2009
- Positive signs of recovery in the Australian first home buyer residential market, buoyed by fiscal stimulus to assist this sector
